

## **Model D Firmware Update Instructions**

## Version 1.0.5 - (13 March 2018)

## Note: The model D updater V1.0.5 supports Windows 7 and onwards.

- 1. Download the Model D Firmware Updater V1.0.5 here: http://www.musictri.be/Categories/ Behringer/Keyboards/Synthesizers-and-Samplers/MODEL-D/p/P0CQJ/downloads
- 2. Connect USB cable from your Model D to computer by using one of its on-board USB ports. Avoid using any USB hubs.
- 3. Connect the power supply and switch on the power for the Model D. You may notice that Windows highlights that a "New Device" has been connected and will install this device to your operating system Please wait for this process to complete before proceeding. Once installed Windows will confirm this.

Model D Updater Start Update Latest Firmware Version:1.0.5 Device Firmware Version:1.0.2 Only For Firmware V1.0.1/1.0.2/1.0.3/1.0.4
Model D Connected

\*If you see "Model D not detected" or if "Device Firmware Version" is blank you may need to update some system files to continue. Please install the Windows ".NET Compact Framework 2.0 Redistributable" (https://www.microsoft.com/en-gb/download/confirmation.aspx?id=22808). If this doesn't solve the issue please contact our CARE team.
