

# Notice: For G-70 Version 1.05 Users

## Please read the following before updating your G-70.

If your G-70 currently uses software version 1.05, you will be asked to calibrate several settings after installing OS2.

- \* Please **DO NOT** turn off the power until you complete this calibration setting.
- \* Make sure that you correctly complete this setting, before moving to the next step.

### 1. The G-70's display shows the following message:

**\*\* BENDER CALIBRATION \*\***  
Calibrating the CENTER POSITION:  
Release the Pitch Bend lever, Press ASSIGN SW 1

**Move the BENDER/MODULATION lever left or right once, then let it return to the central position, press the ASSIGN SW 1 button.**

### 2. The display shows the following message:

**\*\* BENDER CALIBRATION \*\***  
Calibrating the HARD LEFT POSITION:  
Move Pitch Bend lever to the left and press ASSIGN SW 1

**Move the BENDER/MODULATION lever to the far left and hold, press the ASSIGN SW 1 button.**

### 3. The display shows the following message:

**\*\* BENDER CALIBRATION \*\***  
Calibrating the HARD RIGHT POSITION:  
Move Pitch Bend lever to the right and press ASSIGN SW 1

**Move the BENDER/MODULATION lever to the far right and hold, press the ASSIGN SW 1 button.**

### 4. The display shows the following message:

**\*\* MODUL CALIBRATION \*\***  
Release the Modulation lever  
Press the ASSIGN SW 1

**Release the BENDER/MODULATION lever so that it returns to the central position, press the ASSIGN SW 1 button.**

### 5. The display shows the following message:

**\*\* MODUL CALIBRATION \*\***  
Press the Modulation lever to the back of the G-70  
and press ASSIGN SW 1

**Push the BENDER/MODULATION lever all the way towards the back of the G-70 and hold, press the ASSIGN SW 1 button.**

The G-70 exits the calibration routine and returns to the main menu.

### 6. Power Off and Power On again, and you can move on to the next updating procedure.
