

Version History - Fixes and Changes

Cubase LE 1.0.10

The following fixes/changes have been implemented in Cubase LE version 1.0.10

- MP3 Encoding has been restricted to 30-days or 20 encodings – compliant with the new license.

The following fixes/changes have been implemented in Cubase LE version 1.0.9

- “Reset All” in the “Device Setup” was crashing on some systems.
- "Help" -> "Register Offline...": Steinberg Registration.pdf did not appear under certain circumstances this has been fixed.
- Product registration: Steinberg data privacy statement added.
- Product registration: Steinberg product offer statement added.
- Empty dialog templates in “Device Setup” removed.
- Loading Soundfont banks does support UNC paths.
- Added menu item "Upgrades" -> "Special Offers..."
- URL Link to "www.be-cool.org" changed to www.imsta.org
- Number of virtual instrument slots has been changed from 4 to 2

PLEASE NOTE: Tutorial 5 – “Using VST Instruments” no longer works with this version due to new VSTi slot limitation. Also, any manual references to “4 virtual instrument slots” should read “2 virtual instrument slots” instead.

The following new features have been added in Cubase LE version 1.0.9

- Number of simultaneous recording/playback channels has been increased to 4 mono or stereo

The following new features have been added in Cubase LE version 1.0.8

- Pinnacle online registration removed
- New Steinberg online registration added (PC-version only)
- Offline registration added (using PDF form)
- Fixes a problem with I/O configuration (limitation of simultaneous audio ports)
- Fixes a crash with “Reset All”
- Adds graphics during installation (PC-version only)
- Adds Steinberg serial number request at installation (PC-version only)

- Updated some parameters for “silent parameters”
- OSX installer is now MacOSX 10.4 (“Tiger”) compatible (OSX-version only)

The following new features have been added in Cubase LE version 1.0.7

- Implemented support for “silent install”
